WHAT WE AIM FOR

DITABIS wants to enable you to turn your idea into a market ready, high quality MedTech device. With over 25 years of experience, we are your reliable partner as a CDMO (Contract Development and Manufacturing Organisation) that performs all steps necessary to let you reach your goals.

OUR CLIENTS

It doesn't matter whether you need a developer, producer, or a one-stop solution for your project.

We adapt our services to your needs and thus ensure a high degree of efficiency and cost-effectiveness.

YOUR BENEFITS

We work for Start-Ups, long-established medium sized companies as well as the market's big players. Working within an agile design environment, our specialized and experienced engineers along with our highly skilled production personnel will help you get your new product developed and on a fast track to market.

LIFE SCIENCES

CONTRACT MANUFACTURING

Quality “Made in Germany” is our pride. At the headquarters in Pforzheim where our production is located, we don’t just produce devices - we build trust. Every detail is crafted with dedication to meet the highest standards.

- Contract manufacturing for internally and externally developed devices
- Made in Germany
- Worldwide supply chain
- ERP based assembly
- In-house QA and logistics

With its team of highly skilled workers, DITABIS is specialized in producing devices in both small and large production numbers. Key to our success is the vast experience in the transition from pre-series to large serial production. This saves time and reduces cost.

Let’s find out how we can elevate your business and check out production opportunities at DITABIS!

LIFECYCLE MANAGEMENT CERTIFICATION

LIFECYCLE MANAGEMENT

DITABIS is your co-pilot over the course of the whole product life cycle. We can provide various additional services such as:

- Repairs
- Maintenance
- Service
- Spare part support
- Trainings

CERTIFICATION

Of course, DITABIS has all necessary certifications for the development and manufacturing of laboratory and medical devices. Our specialists monitor the projects from the very beginning to ensure a high level of quality regarding regulatory affairs.

- ISO 9001 & ISO 13485
- project related consulting services
- MDR | IVDR
